PROJECTS & CODE REVIEW

github.com/Lakston   codepen.io/Lakston

- **PERSONNAL WEBSITE -** fabpomata.com

  React, React-Router, mobX, Webpack, es6/7, babel

  Used React to create a responsive and bilingual dynamic view rendering.
  Used mobX to store the website's data and render it via React depending on the chosen language.
  Leveraged Webpack's capabilities to create an easy to code environment and seemingless deployment system using npm scripts and console commands.

- **PHOTOGRAPHY PORTFOLIO -** lakston.tk

  React, React-Router, mobX, Webpack, es6/7, babel

  Customized landing page with a random photograph depending on resolution and screen orientation using CSS breakpoints inside the homepage's React component.
  True Fullscreen gallery experience with multiple navigation option using browsers native APIs.
  Used template string with CSS in React components to create a responsive grid design that fit all devices.
